

2nd Grade Weekly Report

Week of March 23rd to 27th

OUR LEARNING

MATHS: During this week, we counted on and counted back in steps of 10 and 100; we recognised even and odd numbers and we estimated the number of objects.

ENGLISH: This week we learned possessive pronouns, possessive adjectives, sounds of the alphabet (especially /th/, /sh/, /ch/), and how to differentiate between the articles "a" and "an". We also took our first evaluation.

SCIENCE: We learned that plants need light and a good temperature to grow healthy. We saw the difference between a healthy and an unhealthy plant. We learned that plants, animals, and humans have similar life cycles. We also learned that we can eat some parts of plants.

HUMANITIES: This week, we reviewed the main communities of the unit. We prepared a presentation for the community they chose. They practiced and presented it.

LENGUAJE: Durante esta semana aplicamos la estrategia lectora de extraer información explícita. Además, leímos e identificamos los elementos de un poema (versos, estrofas y rimas). Finalmente, trabajamos en la escritura creativa de un poema.

COMPUTING: Los alumnos escriben actividades en que los robots o computadores nos ayudan día a día.

OBSERVATIONS/REMINDERS

Traer cubiertos

Have a great weekend!
